ARCHITECTURAL PAVEMENTS AND RETAINING WALLS
Designed and installed in some of the most prestigious commercial spaces in North America, Architects, Landscape Architects and Engineers trust Unilock to bring their architectural vision to life and to withstand the toughest rigor of a commercial environment.

LANDSCAPE ARCHITECT: Michael Van Valkenburgh Associates
Woven into the generous campus landscape fabric is a network of smaller, intimate gathering spaces designed for the social needs of contemporary undergraduate life. Within this context lies the central courtyard of the new college residences. Mediating significant site grade changes and programmatic challenges, this lively outdoor space focuses on fostering diversity and community engagement, while connecting the past and future of the college.

To achieve the desired paving pattern, two colors of 8” City Park Paver™ were used: Winter Marvel and Midnight Sky in the Umbriano® finish. This finish resembles natural granite with the proprietary ColorFusion™ technology and the built-in EasyClean™ help to ensure this space is easier to maintain. This unique patterning creates the intricate, modern and stimulating pixelated pattern.
APPLICATIONS
STREETSCAPES

Creating urban centers with visual appeal and style, while reflecting the character of the town or city, demands the right products to capture the spirit of the space. Our extensive range of exclusive textures, colors and sizes allow you to explore the design diversity required with products that will stand up to the application. High-traffic roads require heavy-duty paving and with Unilock, using the right unit paver can make a powerful impression.

COMMERCIAL RETAIL

In commercial environments, Unilock pavers and retaining walls offer a wide range of design solutions. Whether you are working with our standard product palette or taking advantage of our extensive custom capabilities, you will have the right products to bring your vision to life. Adding atmosphere, scale, flow and harmony, you will have the selection you need to meet your design objectives.

APPLICATIONS

PARKS & RECREATION

Seamlessly complement the beauty of gardens, fountains and other natural or man-made design elements, with the confidence that the paving material you select will stand up to the rigor of its environment. Unilock products offer advanced surface technologies that deliver a variety of benefits including stain resistance and easy cleaning properties. This makes them an ideal choice for high-traffic pedestrian areas.

URBAN PLAZAS

For centuries, Europeans have been gathering in public squares for farmers markets, community events and entertainment. This tradition continues in modern day North America with citizens drawn to public spaces to relax or catch up with friends. The extensive collection of Unilock styles, colors and textures provide infinite design choices to reflect the surrounding environment and to bring a sense of community to any urban outdoor space.

Applications

Offices

Successful commercial design incorporates elements which enhance a company’s brand image and the building’s architectural style. Linear patterns, color and texture are used to encourage flow and create stunning visual effects without compromising function. The wide range of Unilock sizes and styles allow you to create just the right look and feel.

Product: Umbriano®
Vibrant and inviting outdoor spaces are essential in every multifamily development. Using a variety of textures, colors and sizes you can create spaces that are flexible, serving a full range of activities to encourage socialization yet offer solitude. Taking advantage of the site’s exposure to sun, air and views, you can create a journey through the courtyard’s social and private, open and secluded, active and passive spaces.

ROOF DECKS

The opportunity to reclaim a functional space and turn it into an attractive destination has never been greater. Unilock offers a full line of architectural roof deck pavers with the same great finishes used for on-grade applications. This makes it easier than ever to create harmony between the building’s outdoor space and the site paving.

Look for EasyClean in Umbriano® CF 90, Senzo™ CF 100, Arcana CF 100 and Soreno CF 100.
PAVER CONSTRUCTION

GOOD  STANDARD THRU-MIX

This is how the first pavers were manufactured. The product mix of large and small aggregates is consistent, from top to bottom, with color mixed throughout. The Unilock® Classic pavers we manufacture exceed all ASTM standards for quality and strength.

BETTER  FACEMIX  ENDURACOLOR™

Facemix products are manufactured in a two-step process which combines a base of coarser aggregates for a stronger foundation, with concentrated color and wear-resistant finer aggregates on top. Facemix products are highly resistant to fading because the top layer prevents large, lighter color aggregates from showing through. This is the manufacturing process for Unilock EnduraColor products.

BEST  ENDURACOLOR™

Only Unilock offers EnduraColor™ Plus Architectural Finishes, a collection of products that deliver long-lasting beauty through a proprietary blend of exclusive and superior ingredients. A complex blend of granite and quartz, some of nature’s highest performing minerals, are combined to create ultra-realistic surface textures and unique style options that are exceptionally durable. Proprietary manufacturing technologies like Ultima™, EasyClean™, ColorFusion™ and Reala™ give these products added benefits in terms of beauty and function.

A NEW STANDARD FOR EVERLASTING BEAUTY.

QUALITY ASSURED

Unilock manufacturing teams have an unrelenting commitment to shipping only top quality products. Our world-class production facilities are renowned for their safety and cleanliness and are staffed with the most experienced production quality control staff in the industry. Our continual investment in the most technologically advanced equipment ensures we’re able to provide the best in product quality, consistency and design.

- Tested from raw materials to finished product
- Tested hourly for product density
- Designed to meet all dimensional tolerances
- Above industry quality standards (ASTM & CSA)
- Durable and slip-resistant
- Made with colorfast pigments
- Resistant to salt erosion and chlorine
- Designed to tolerate oil or gas spills
Unilock® allows you to customize products to suit your project. Our vast array of sizes, edges, finish and color options make it easy to achieve your design vision. Speak with your Unilock Representative about custom options available in your market.
Not all shapes and sizes are available in all regions, or in all finish or edge options (not shown). Consult your Unilock Representative for more information. All measurements are nominal. T = height / thickness of the slab or paver.
When texture is a primary design consideration, start here. Unilock offers the traditional surface finish as well as very unique and durable mottled, matte, exposed aggregate, brushed, smooth and riven finishes.

To ensure your project delivers on durability and long-lasting color, insist on EnduraColor.

FULLNOSE          6 x 12 x 2 ¼”  (15 x 30 x 7cm) NOT AVAILABLE IN NEW YORK BLEND
Since Unilock introduced permeable pavers to North America more than twenty-five years ago we have steadily increased our selection of sizes, shapes, colors and finishes. Our permeable unit pavers are self-aligning, with joint spacing that complies with the Americans with Disabilities Act.
ECO-PRIORA™

This versatile, customizable, permeable unit paver is designed with special spacer bars. The resulting 7mm gap is filled with a clear, fine stone chip that allows the rapid penetration of rainwater into the sub-base and subsoil.

ECO-PROMENADE™ PERMEABLE

Eco-Promenade plank paver brings the long linear look and feel to any contemporary permeable application while being capable of vehicular loads. Available in many custom finishes and colors to suit your project design.

THORN BURY™ PERMEABLE

Thornbury permeable has a modestly textured surface and three compatible sizes allowing for a pleasingly, random look and feel. Available in many stock colors, yet open to customization to complement your design.
Town Hall street paver with Ultima™ Technology has been designed to satisfy both traditional and permeable installation methods while maintaining a time-worn, historical and distressed appearance using Reala™ Technology.

City Park Paver permeable is a traditional urban paver shape with the added benefit of being permeable and is available in many custom finishes and colors. This paver shape is a class-act no matter what the application, residential, park or plaza.

See product details on page 45  *Please contact your Unilock Representative for more details.

City Park Paver can be manufactured in a variety of custom colors and textures. See product details on page 42. Minimum quantities may apply. *Please contact your Unilock Representative for more details.
DETAILS

JOINTING COMPOUND OPTIONS

POLYMERIC SAND
A special mix of graded sand and binder specifically formulated for achieving optimum lock-up of pavers and slabs.

EASY-PRO™
Pre-mixed and ready to use, no haze formulation, that can be applied during dry or wet weather. For joint widths from \( \frac{1}{4} \)" (6.3mm) and depths from \( 1 \frac{1}{4} \)" (30mm).

UNILOCK FLEXIBLE EPOXY MORTAR - D1
Many times stronger than polymeric, this high strength, permeable, yet flexible, epoxy mortar is suitable for medium traffic loads up to 7.5 tons. It is easy to install, self-compacting and can be applied during dry or wet weather and does not require additional expansion joints. For joint widths from \( \frac{1}{4} \)" (6.3mm) and depths from \( 1 \frac{1}{4} \)" (30mm).

GRANITE CHIP
This high-strength crushed and washed granite meets ASTM No. 9 Stone Specifications for permeable joint filler. Available in a range of colors to work with your paving design.

JOINTING COLORS
Changing the jointing sand color can dramatically change the look and feel of the pavement surface. Various colors are available in traditional sands or polymer modified and epoxy modified compounds.

Courtstone® (Basalt / Belgian Blue)

BLACK SAND

TAN SAND

GREY SAND

NIGHTTEC®
NighTec is a subtle way to provide accent lighting on your project without wiring, batteries or charging. NighTec photo luminescent pavers glow from absorbed sunlight during the day and can be installed like any other unit paver.

NighTec paver during daytime.

NighTec paver during nighttime.
Unilock’s full line of architectural slabs offer many different finish and color options. Continue themes from on-grade to rooftop applications creating a harmony between building site paving and outdoor spaces.
SORENO

Soreno features a flamed-like texture made of fine-grained, natural stone grit for a surefooted surface that is smooth and elegant in appearance.

11 ¼ x 23 ¼ x 2”
301 x 606 x 50mm

EASYCLEAN™ STAIN RESISTANCE- CF® 100
An integral surface protection that allows for easier cleanup of spills when they happen, before a stain can develop.
Arcana has a fine blasted texture of natural stone chips in subtle color tones creating an extremely durable surface, ideal for high traffic pedestrian areas.

COLORS (Consult your regional Product Data Resource Guide to find locally stocked colors)

VIVANTO  MODENA  LUGANO

PRODUCT SPECIFICATIONS

EASYCLEAN™ STAIN RESISTANCE- CF® 100
An integral surface protection that allows for easier cleanup of spills when they happen, before a stain can develop.

Arcana is not recommended for vehicular traffic.
Ideally suited for roof decks, walkways, patios and pool decks, Rivenstone offers the subtleties of natural flagstone while maintaining the durability and consistency of concrete.

COLORS (Consult your regional Product Data Resource Guide to find locally stocked colors)

Rivenstone is not recommended for vehicular traffic or vehicular snow plowing. Selection may vary by market.
Ideally suited for roof decks, walkways, patios and pool decks, Yorkstone offers the subtleties of limestone while maintaining the durability and consistency of concrete.

COLORS  (Consult your regional Product Data Resource Guide to find locally stocked colors)

HONEY GOLD  IRON RIVER (SRI 61)

REALA™ TECHNOLOGY
Ultra realistic textures are cast from natural stone, brick and historic cobblestones.

PRODUCT SPECIFICATIONS

24 x 24 x 1 ¾”  
(60 x 60 x 4.5cm)  

18 x 24 x 1 ¾”  
(45 x 60 x 4.5cm)  

12 x 24 x 1 ¾”  
(30 x 60 x 4.5cm)
Unilock offers a full line of architectural roof pavers with EnduraColor™ and EnduraColor™ Plus Architectural Finish options that were traditionally designed for on-grade applications. This creates a harmonious looking project between building outdoor spaces and site paving.

Contact your Unilock Representative to determine available finishes and colors in your region. • stocked product in select locations, contact your Unilock Representative

*Order only (verify locally manufactured finishes with your Unilock Representative)*

All sizes are nominal. Verify actual paver dimension to establish grid spacing.
Unilock products can be installed on the roof deck using different installation systems, relevant to the site conditions. The cross sections below are examples of the type of installation. Please contact your Unilock Representative for further technical information.

**PEDESTAL SYSTEM**

**GRANULAR BASE SYSTEM**

**SAND SET WITH DRAINAGE MAT AND INSULATION**

Unilock architectural roof pavers are manufactured in four thicknesses and range from 19 lbs/sq.ft. to 46 lbs/sq.ft. to accommodate various roof structural weight limits. Each is manufactured to exceed minimum flexural strength requirements of both the ASTM* C293 and CSA** A231.1, to be placed on pedestal systems.

Contact your Unilock Representative for specific product results.

*ASTM – American Society of Testing and Materials  **CSA – Canadian Standards Association
As an authorized distributor of Bison Innovative Products, Unilock can provide required pedestals and accessories.

VERSADJUST
• Supports heaviest load 1250 lbs per pedestal (FS:3)
• Integrated leveler accommodates zero to 0.5"/foot slope
• Height adjustment ranges from 2 ¼" to 36".
• Accessories for heights from ½" to 2 ¼"
• Contains 20% post industrial recycled material
• Impervious to water, mold and freeze/thaw
• Made in U.S.A.

LEVEL-IT
System available for height adjustment ranges from ½" to 12" and supports heaviest loads of 750 lbs per pedestal (FS:3).
LEED® CREDIT OPPORTUNITIES

LEED, or Leadership in Energy & Environmental Design, is a green building certification program that recognizes best-in-class building strategies and practices that have a positive impact on the health of occupants, while promoting renewable, clean energy. To receive LEED certification, building projects satisfy prerequisites and earn points to achieve different levels of certification. Unilock products can help with your certification goals.

POTENTIAL LEED CREDITS FOR UTILIZING PERMEABLE PAVERS

RAINWATER MANAGEMENT: LEED V4

Up to three points can be achieved for retaining rainwater onsite based on the percentile kept. 85% (zero lot line projects only) • 3 points, 95% - 2 points and 98% - 3 points. (all except Healthcare - subtract one point)

See LEED v4 for more specific project/site details.

MATERIALS AND RESOURCES: LEED V4

Building Product Disclosure and Optimization - Sourcing of Raw Materials - Sourcing of Raw Materials and Extraction • 1 point
Building Product Disclosure and Optimization - Sourcing of Raw Materials - Leadership Extraction Practices • 1 point
Building Product Disclosure and Optimization - Material Ingredient Reporting - Material Ingredient Reporting • 1 point
Building Product Disclosure and Optimization - Material Ingredient Reporting - Material Ingredient Optimization • 1 point
Building Product Disclosure and Optimization - Environmental Product Declaration • 1 point

HEAT ISLAND REDUCTION - NON-ROOF: LEED V4

Paving materials with a three-year aged solar reflectance (SR) value of at least 0.28. If three-year aged value information is not available, use materials with an initial SR of at least 0.33 at installation OR use an open grid pavement at least 50% pervious • 2 points (except Healthcare - 1 point)

See LEED v4 for more specific site calculations.

SOLAR REFLECTANCE

Solar Reflectance Index (SRI) is a criterion used by USGBC that measures values of sunlight and radiation bouncing from built surfaces. It is used to measure urban heat island effects in city centers. Dark pavement absorbs heat during the day and then releases it at night. This process creates a situation that causes urban centers to stay warmer all the time which contributes to air pollution and increased energy consumption. Careful selection of materials and colors can help reduce urban heat island effects.

| SAMPLE OF QUALIFIED UNILOCK COLORS (>33) |

| Standard Finish | Nevada | ![Swatch](image11) | 0.31 | 33 |
| Stonemark Finish | Iron River | ![Swatch](image12) | 0.52 | 61 |

Values may change slightly by region due to variations in local aggregate. Please be sure to contact your Unilock Representative for a comprehensive and current list of SRI product values.
RECYCLED CONTENT
SUPPLEMENTARY CEMENTITIOUS MATERIALS (SCM)

Concrete is a mixture of sand, coarse aggregate, water and the principal cementitious material which is Portland cement. Today, most concrete recipes also contain supplementary cementitious material (SCM) admixtures. These can be by-products from other processes or natural materials that may or may not have been further processed for use in concrete. These materials may include Fly Ash (Class C or F), Ground Granulated Blast Furnace Slag (GGBFS), Silica Fume, Natural Pozzolans, recycled glass and more.

These admixtures can contribute toward achieving the cumulative minimum recycled content criteria for Leadership Extraction Practices.

Speak with your Unilock Representative about local SCM’s available for custom orders.

PROJECT: Navy Pier. Chicago, Illinois
DESIGN: James Corner Field Operations
PRODUCT: Promenade™ Plank Paver - Series’ 3000 finish in custom colors

Navy Pier, the world’s largest public pier was reimagined for its centennial with pier-wide enhancements designed to elevate its status as the top-attended leisure destination in the Midwest. James Corner Field Operations worked closely with Unilock to create pavers that would help achieve SITES® certification. Using 30% copper slag as recycled content in the pavers created a stronger paver and when combined with local aggregate an attractive ‘salt and pepper’ effect was achieved on the exposed aggregate finish. Subtle changes in the aggregate and pigment created four colors for the pier which will withstand this highly trafficked environment. The reimagining of Navy Pier has created a contemporary ‘pierscape’ with engaged social spaces that encourage movement, exploration, interaction and discovery.
All pavements require a site specific design. A Herringbone laying pattern is essential for most vehicular trafficked pavements and becomes more critical as the demands on the pavements increase. Please contact your local Unilock Representative for specific design details. This chart is only a guideline.

</tbody>
</table>

All pavements require a site specific design. A Herringbone laying pattern is essential for most vehicular trafficked pavements and becomes more critical as the demands on the pavements increase. Please contact your local Unilock Representative for specific design details. This chart is only a guideline. * subject to occasional light duty service vehicles ** installed on a concrete base
A great retaining wall should provide an aesthetic that blends subtly with the environment and surrounding architecture. Segmental retaining walls have been the choice of Landscape Architects, Designers and Engineers who are looking for classic, clean lines and timeless appeal.
LINEO™ DIMENSIONAL STONE
Contemporary and sleek lines define Lineo Dimensional Stone with a linear multi-length plank look. Ideal for garden walls, pillars and other outdoor vertical elements, Lineo Dimensional Stone offers up modern design and exceptional flexibility.

PRODUCT SPECIFICATIONS

| UNIT 1 | 12 x 8 x 4” | 30 x 20 x 10cm |
| UNIT 2 | 16 x 8 x 4” | 40 x 20 x 10cm |
| UNIT 3 | 20 x 8 x 4” | 50 x 20 x 10cm |
| UNIT 4 | 24 x 8 x 4” | 61 x 20 x 10cm |
Unilock’s most natural, versatile and easy-to-use wall system. The unique engineered S-shape and patent pending design creates vertical and lateral interlock for added strength, making it ideal for retaining walls up to 1.8m (6.0’) when combined with geogrid reinforcement.

PRODUCT SPECIFICATIONS

REALA™ TECHNOLOGY
Ultra realistic textures are cast from natural stone, brick and historic cobblestones.

ULTIMA™ CONCRETE TECHNOLOGY
A proprietary manufacturing process that creates pavers and walls with up to four times the strength of poured concrete.

WALL FINISH
RIVERCREST
BUFF
COASTAL SLATE

Ask your Unilock Representative about local color availability.

Winner 2013 design award
PISA 2®/CONCORD WALL™

The built-in setback design of Pisa2/Concord Wall automatically forms the correct slope, ensuring a highly stable retaining wall. Utilizing the tapered components, you can form curved walls and steps. Gravity walls up to 3.5 ft (1m) and grid reinforced walls up to 25 ft (7.5m) high under typical conditions.

COLORS (Consult your regional Product Data Resource Guide to find locally stocked colors)

RomanPisa boasts a distressed appearance that gives the impression that it has been around for decades. Admired for versatility and style, RomanPisa can be used to form straight or curved walls, as well as planters and steps. Gravity walls up to 3.5 ft (1m) and grid reinforced walls up to 25 ft (7.5m) high under typical conditions.

SIENA STONE®

This big, bold stone is impressive as a wall or as treads in large outdoor staircases. SienaStone’s long lines and split face appearance make it an attractive alternative for heavier load bearing applications. Gravity walls up to 10 ft (3m) or grid reinforced up to 40 ft (12m) under typical conditions.

COLORS (Consult your regional Product Data Resource Guide to find locally stocked colors)

NATURAL  BROWN**  GRANITE**  MAHOGANY ASH**  NEVADA**  SIERRA**

PRODUCT SPECIFICATIONS

STANDARD 333  STANDARD 500  STANDARD 925  COPING

Refer to Product Data Resource Guide for unit measurements.
Also available: Corner 90 Right & Left, Corner 45 Right & Left, Closed End Coping.
For detailed product information and local color availability contact your Unilock Representative.
** Available only in Closed End Coping.
**DURA HOLD®**

The large size of DuraHold (1680lbs./762kg.) makes it an appropriate choice for demanding structures up to 40ft. (12.2m). Proper engineering and a good selection of components make this an exceptional wall system for gravity, tie-back or grid reinforced walls. A great alternative to “poured in place” concrete. Gravity walls up to 6 ft (1.8 m) in typical conditions.

For detailed product information and local color availability contact your Unilock Representative.

---

**DURA HOLD2®**

DuraHold2 is similar to DuraHold in appearance, but is almost half the size, (820lbs./363kg.), making it economical for low walls. Concrete tiebacks or Geogrid reinforcement expands the various engineering options, allowing for structures up to 25 ft. (7.62m) high. Gravity walls up to 4 ft (1.2 m) in typical conditions.

For detailed product information and local color availability contact your Unilock Representative.

Take advantage of our years of industry leading expertise and unparalleled personal attention and collaboration, to ensure every intricate detail of your project runs smoothly. Our level of support is tailored to meet your needs, including:

- Product customization
- Budget pricing
- Providing specifications, cross sections and details
- Lunch and Learn continuing education credits
- Samples
- Outdoor Idea Centers
CUSTOM OPTIONS

Every project is unique. We have the expertise, technology and capabilities to create just what you need. Talk to your local representative about combining the many shapes, finishes and colors offered by Unilock to create the ideal product for your project.

UVISION® AND SAMPLES

Choosing the perfect product to complete your vision has never been easier. Our Uvision sample sheets are true-to-life-scale and color to help facilitate your initial product selection. And when the time comes to finalize your selections, your Unilock Representative will bring you all the real life samples you need.

OUTDOOR IDEA CENTERS

Unilock’s Outdoor Idea Centers provide you with the perfect places for inspiration and great destinations for client feedback. When you visit be sure to see, touch and experience all that Unilock has to offer and ask our knowledgeable team any questions you have.

LUNCH AND LEARN

At Unilock, there is always something new. Ask your Unilock Representative about a Lunch and Learn session that also earns you valuable continuing education credits.

We’re here to help through every step of your project. Talk to your Unilock Representative today to get all the details.
